

Kindergarten Activity of Letter 'O'

Made Octopus with Craft Paper

Conducted by DWPS Rajkot

The DWPS-Rajkot Kindergarten teacher recently conducted an activity to teach students about the letter 'O'. The activity involved making an octopus out of craft paper.

The students were first given a piece of blue craft paper. They were then instructed to cut out a circle from the paper. This circle would be the body of the octopus. Next, the students were given eight strips of red craft paper. These strips would be the octopus's tentacles. The students were instructed to glue the tentacles to the body of the octopus. Finally, the students were given two googly eyes to glue onto the octopus's head.

Learning Outcomes

The students learned several things from this activity. They learned about the letter 'O' and how to identify it. They also learned about octopuses and their physical characteristics. Additionally, the students practiced their fine motor skills by cutting and gluing the craft paper.

The DWPS-Rajkot Kindergarten Activity of Letter 'O' Made Octopus with Craft Paper was a successful activity that helped students learn about the letter 'O' and octopuses. The students also had fun creating their own octopuses.
